PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience in designing, developing, testing, and deploying scalable web applications using the MERN Stack (MongoDB, Express.js, React.js, Node.js). Proficient in JavaScript, TypeScript, React.js, Next.js, RESTful APIs, JWT Authentication, MongoDB, PostgreSQL, Git, and responsive UI development. Experienced in Agile methodologies, SDLC, API integration, database design, debugging, performance optimization, and version control. Passionate about building scalable, secure, and user-centric applications.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), C++, Java, SQL, TypeScript
Backend: Node.js, Express.js, REST APIs, JWT Authentication
Tools: Git, GitHub, VS Code, Postman, npm, Render, Vercel

Frontend: HTML5, CSS3, React.js, Next.js, TailwindCSS,
Database: MySQL, SQL Server, MongoDB, PostgreSQL
Concepts: OOP, Data Structure and Algorithm, API Integration

EXPERIENCE

Software Developer Intern

March 2026- April 2026

Shivam Informatics, Rohtak, Haryana

- Developed and enhanced **Flutter-based business application features**, including dashboard components for improved data visualization and user insights.
- Designed and implemented **responsive dashboard UI components** with focus on usability, layout consistency, and application performance.
- Developed a responsive event-management website using React.js, creating reusable UI components and implementing responsive layouts across devices.
- Collaborated with the development team to understand requirements and deliver application features according to business needs.

Full Stack Developer Intern — Indux Technologies

Aug 2025- Dec 2025

Remote

- Developed and enhanced CRM modules for managing leads, clients, employees, and administrative data using React.js and RESTful APIs.
- Implemented lead management functionality including lead creation, updating, organization, and status management to streamline CRM workflows.
- Developed Excel import/export functionality for bulk lead management, reducing manual data entry and improving operational efficiency.
- Integrated React.js frontend components with backend REST APIs for seamless data retrieval, submission, and updates.
- Built and improved responsive UI components using React.js, focusing on usability, consistency, and cross-device compatibility.

PROJECTS

RateFlow – Multi-Tenant B2B Billing & Inventory Management SaaS

Tech Stack: React.js, TypeScript, Node.js, Express.js, MongoDB, JWT, Tailwind CSS

- Developed a multi-tenant SaaS platform for B2B distributors to manage customers, products, invoices, inventory, payments, and outstanding balances.
- Implemented JWT-based authentication and authorization with tenant-level data isolation to ensure secure access across organizations.
- Designed and developed RESTful APIs using Node.js and Express.js for customer, product, inventory, invoice, and payment management.
- Implemented customer-specific pricing and credit management functionality to support flexible business pricing and outstanding payment tracking.

Whatsy – Real-Time Chat Application

Tech Stack: React.js, Node.js, Express.js, MongoDB, Socket.IO, JWT, Tailwind CSS

- Developed a real-time chat application using the MERN Stack with secure user authentication, authorization, and messaging functionality.
- Implemented JWT-based authentication and protected routes to provide secure user sessions and access-controlled application features.
- Integrated Socket.IO to enable real-time, bidirectional communication for instant message delivery between connected users.
- Implemented MongoDB database integration for storing and retrieving user profiles, chat data, and messages.

EDUCATION

B.Tech in CSE – Maharshi Dayanand University

2022-2026

UIET MDU, Rohtak, Haryana
